Notes to the Condensed Interim Consolidated Financial Statements September 30, 2013

(Expressed in US dollars)

1. Nature of Operations

Rio Cristal Resources Corporation ("Rio Cristal" or the "Company") is in the business of acquiring and exploring mineral properties located in Peru. The Company is publicly traded with shares listed on the TSX Venture Exchange and the Lima Stock Exchange. The Company's head office is located at Suite 206, 9440 202 Street, Langley, British Columbia V3G 2M6 and the registered and records office is located at 10th Floor, 595 Howe Street, Vancouver, British Columbia V6C 2T5.

The Company has focused much of its resources in the past on the Bongará zinc project, located in Northern Peru. The Company had an option to acquire 100% interest in the project by making cash payments, issuing common shares of the Company, or a combination of both. The Company has allowed this option to lapse and therefore does not have any active exploration projects.

The business of mining and exploration involves a high degree of risk and there can be no assurance that exploration programs will result in profitable mining operations. The Company's activities in Peru are subject to the impact of changes in legal, tax and regulatory regimes at the national level and changes in community relations, labor and political issues at the local level. While the Company actively monitors all such changes and makes plans accordingly, factors beyond the Company's control could adversely impact its operations in Peru. The Company believes that the current conditions in Peru are stable and conducive to conducting business. The Company's current and future mineral exploration and mining activities could be impacted by adverse political or economic developments. The adverse developments may include the imposition of unfavourable government regulations on foreign investment.

2. Going Concern

These consolidated financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Several adverse conditions cast significant doubt on the validity of this assumption. The Company has incurred losses since inception and has an accumulated deficit of \$23,853,429 at September 30, 2013. The Company has limited resources, has no source of operating cash flow and has no assurances that sufficient funding will be available to meet its administrative overhead and conduct further exploration and development on new properties, should any new properties be acquired.

The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to meet its requirements. However, there can be no assurance the Company will be successful in these initiatives. These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

3. Basis of Preparation

The interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended March 31, 2013, which have been prepared in accordance with IFRS as issued by the IASB.

The following standards became effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Company adopted these standards and they did not have a material impact on its consolidated financial statements.

- a) IFRS 10, Consolidated Financial Statements ("IFRS 10"), was issued in May 2011 and will supersede the consolidation requirements in SIC-12, Consolidation Special Purpose Entities ("SIC-12"), and IAS 27, Consolidated and Separate Financial Statements ("IAS 27").
- b) IFRS 11, Joint Arrangements ("IFRS 11"), was issued in May 2011 and will supersede existing IAS 31, Joint Ventures ("IAS 31").
- c) IFRS 12, Disclosure of Interests in Other Entities ("IFRS 12"), was issued in May 2011 and is a new and comprehensive standard on disclosure requirements for all forms of interest in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities.
- d) IFRS 13, Fair Value Measurements ("IFRS 13") was issued in May 2011 and sets out, in a single IFRS, a framework for measuring fair value. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This definition of fair value emphasizes that fair value is a market-based measurement, not an entity specific measurement. In addition, IFRS 13 also requires specific disclosures about fair value measurement.
- e) IAS 1, Presentation of Items of Other Comprehensive Income ("OCI") ("IAS 1"), was revised in June 2011 to change the disclosure of items presented in OCI, including a requirement to separate items presented in OCI into two groups based on whether or not they may be recycled to profit or loss in the future.
- f) IFRIC 20, Stripping Costs in the Production Phase of a Mine ("IFRIC 20") was issued in October 2011. This interpretation provides guidance on the accounting for the costs of stripping activity in the production phase when two benefits accrue to the entity: usable ore that can be used to produce inventory and improved access to further quantities of material that will be mined in future periods.

The interim condensed consolidated financial statements were approved by the Board of Directors on August 21, 2013.

All dollar amounts are presented in US dollars unless otherwise specified.

Bongara Project, Peru

By agreement dated April 17, 2007 and as amended on November 15, 2007, the Company acquired 100% of Cerro La Mina S.A. ("CLM") from a company controlled by the founding shareholder of the Company, Compania Minera Pilar del Amazonas ("Amazonas"). CLM held the right to acquire 100% of the rights to the Bongara Project in the Amazonas Region of Peru. In exchange, the Company issued 5,000,000 common shares to the founding shareholder pursuant to the amended agreement dated November 15, 2007. The 5,000,000 shares were being valued on the following time schedule provided the property option agreement remained in good standing: an initial 5% tranche of property shares (250,000 shares) were valued on January 29, 2008 which is the date the common shares were listed on the TSXV and subsequent valuation of 5% each nine months thereafter for the

following eighteen months, and 10% each nine months thereafter over the next forty-eight months, provided that no more than 2,500,000 of the shares may be released pursuant to the foregoing formula until the Issuer had completed a preliminary economic assessment as defined in National Instrument 43-101 in respect of the Project and met certain other conditions. As at March 31, 2013 the Company had released 2,500,000 shares from escrow. No value had been attributed to the remaining 2,500,000 shares at March 31, 2013 due to the performance conditions described above.

On March 26, 2009, the Company amended its Mining Concession Transfer Agreement ("Concession Transfer Agreement") with Amazonas on its Bongara claim block in northern Peru.

In order to acquire the Bongara concessions, the Company at its option, was required to make the following payments, under the amended agreement, to a company controlled by the founding shareholder:

6. Derivative Liability - Warrants

Warrants issued in private placements that have an exercise price denominated in a currency other than the Company's functional currency meet the definition of a derivative liability and are recorded as a financial liability and are marked-to-market each period. Subsequent changes in the fair value of the warrants will be recognized as gains or losses in the statement of loss and comprehensive loss until they are fully exercised.

On January 21, 2013, a total of 620,913 warrants were granted as part of units in a private placement transaction (Note 7). Of the total granted, 602,913 warrants have an exercise price denominated in Canadian dollars and are accounted for using marked-to-market accounting policy. The remaining 18,000 warrants were granted to agents for services provided for a capital raising transaction and have an exercise price denominated in Canadian dollars but are not classified as a financial liability of the Company. The initial fair value of these warrants have been recognized as a share issuance costs and included in contributed surplus.

The changes in financial liability warrants during the six months ended September 30, 2013 and the year ended March 31, 2013 were as follows:

7. Capital

Authorized share capital

Unlimited common shares without par value

On July 31, 2013, the Company completed a 10:1 share consolidation which was approved by the shareholders at the AGM on September 18, 2012.

On June 14, 2013, the Company issued 1,712,208 shares relating to the option payment on the Bongara property owing at March 15, 2013.

On January 21, 2013, the Company issued 602,913 units as part of a non-brokered private placement for total proceeds of \$237,994. The units were issued in two parts. The first is for 442,913 units (the "First Units") of the Company at the price of Cdn\$0.35 per First Unit, each First Unit consisting of one common share and one non-transferable warrant. The second involved an issuance to certain Directors and an officer of 160,000 units (the "Second Units") at a price of Cdn\$0.50 per Second Unit, each Second Unit consisting of one Share and one non-transferable warrant.

Each first Warrant entitles the holder to purchase one additional Share (a "Warrant Share") at an exercise price of \$0.60 for the first year and \$1.00 for the second year. Each second Warrant shall entitle the holder to purchase a Warrant Share at an exercise price of \$1.00 for two years.

In addition, commencing on the date that is four months and one day after the closing of the private placement, if the closing price of the Company's common shares on the TSX Venture Exchange (the "Exchange"), is at a price equal to or greater than \$1.20 for a period of ten (10) consecutive trading days, the Company will have the right to accelerate the expiry date of all Warrants by giving written notice to the holders of the Warrants which will then expire on the date that is not less than thirty (30) days from the date of the notice.

As part of the non-brokered private placement, a finder's fee was paid consisting of: (i) a cash commission of \$4,254; and (ii) the issuance of 18,000 Second Units (the "Finder's Fee Units"). The warrants attached to the First Units and Second Units have been valued initially at \$65,395 (Cdn\$64,798) and \$25,248 (Cdn\$25,035), respectively, based upon the Black Scholes model which utilizes the following weighted average assumptions:

(An exploration stage company)

Notes to the Condensed Interim Consolidated Financial Statements

September 30, 2013 (Expressed in US dollars)

	2013
Expected dividend yield	0.00%
Expected stock price volatility	118%
Risk-free interest rate	1.19%
Expected life of options	2.0 years

The Finder's Fee Units have been valued at Cdn\$0.50 per unit totaling \$9,060 (Cdn\$9,000). Each Finder's Fee Unit has the same terms as the Second Units. The warrants attached to the Finder's Fee Units have been valued at \$2,835 (Cdn\$2,816) based upon the Black Scholes model which utilizes the same weighted average assumptions as shown above.

On June 8, 2012, the Company issued 1,384 additional common shares related to the option payment on the Bongara property in the prior period. Due to a change in the calculation method, the number of shares required to be issued increased, but the total value of the shares did not change.

Share Purchase Options

The Company has established a share purchase option plan whereby the board of directors may, from time to time, grant options to directors, officers, employees or consultants. Options granted must be exercised no later than five years from the date of grant or such lesser period as determined by the Company's board of directors. The exercise price of an option is not less than the closing price on the TSX Venture Exchange on the last trading day preceding the grant date. Options begin vesting on the grant date based on a schedule outlined in the share purchase option plan. The option plan provides that the aggregate number of shares reserved for issuance under the plan which may be made subject to options at any time and from time to time (including those issuable upon the exercise of pre-existing options) shall not exceed 10% of the total number of issued and outstanding shares, on a non-dilutive basis, as constituted on the grant date of such options. At September 30, 2013 a total of 1,121,749 options remain reserved under the Plan exclusive of the 579,167 options outstanding.

a) Movements in share options

The changes in share options during the period ended September 30, 2013 and the year ended March 31, 2013 were as follows:

	September 30, 2013		March 31, 2013

b) Fair value of share options granted

During the year ended March 31, 2013, the Company granted 255,000 options to employees, officers, directors and consultants of the Company at a weighted average exercise price of Cdn\$1.10. These stock options were valued at a total of Cdn\$259,806 with a weighted average fair

(An exploration stage company)

Notes to the Condensed Interim Consolidated Financial Statements September 30, 2013

(Expressed in US dollars)

value of Cdn\$1.00. The allocation of fair value was estimated using the Black-Scholes option pricing model with the following weighted average assumptions.

	Year ended
	March 31, 2013
Expected dividend yield	0%
Expected stock price volatility	174%
Risk-free interest rate	1.54%
Expected life of options	4.21 years

Option pricing models require the input of subjective assumptions including the expected price volatility and the expected option life. Changes in these assumptions can materially affect the estimated fair value of the stock options granted. The stock options vest in one-third increments, a third of the stock options vest on the grant date, the remaining stock options vest on the anniversary of the grant date over a two year period.

c) A summary of the Company's options as at September 30, 2013 is as follows:

Outstanding Options	Options Exercisable	Price per Share	Remaining Contractual Life (Years)	Expiry Date
