of time incurred on the Company's affairs.

General office expenses of \$6,787 for the three months ended June 30, 2022 increased from \$2,301 in the same period of the previous fiscal year. General office expenses also represent the allocation at cost of office expenses from the related management company. The increase in general office expenses allocation in the three months ended June 30, 2022 is primarily due to the impact of the amortization of deferred liability offsetting general office expenses in the three month period June 30, 2021. The deferred liability has been fully amortized by November 2021.

LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2022, the Company had cash and cash equivalents of \$2,862,590 compared to \$2,874,393 at March 31, 2022.

Operating activities used cash of \$16,819 for the three months ended June 30, 2022, compared to use of cash of \$4,898 for the three months ended June 30, 2021. The increased use of cash for the three months ended June 30, 2022, compared to the same periods of the previous fiscal year is mainly attributable to the timing of payments affecting changes in non-cash working capital items such as prepaid expenses and accounts payable and accrued liabilities.

Cash inflow from financing activities of \$5,011 for the three months ended June 30, 2022 relates to interest income received. Cash inflow from financing activities of \$20,000 for the three months ended June 30, 2021 mainly relates to proceeds from exercise of share purchase warrants of the Company.

At June 30, 2022, the Company had cash and cash equivalents of \$2,862,590, working capital of \$2,849,555, loss for the three months ended June 30, 2022 of \$23,571 and a deficit of \$31,718,025. Based on anticipated cash flows, the Company is expected to have sufficient resources to meet its committed expenditures for the next twelve months.

On March 11, 2020, the novel coronavirus outbreak ("COVID-19") was declared a pandemic by the World Health Organization. The situation has been and continues to be dynamic and the ultimate duration and magnitude of the impact on the economy and the Company's business are not known at this time. The Company's ability to obtain equity financing could be impacted, as well as the Company's ability to explore and conduct business.

The Company operates in Canada and a small portion of its expenses are incurred in United States dollars ("US dollars"). Liquidity risk

Liquidity risk arises through excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, acquire or dispose of assets or obtain debt financing. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing development efforts, the Company does not pay out dividends.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

Risk factors

The Company currently has no revenues from operations. Should the Company decide to explore or acquire mineral property interests it may require additional funding, which the Company will likely seek from the equity markets. There can be no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. An investment in the Company's common shares is highly speculative and subject to a number of risks and uncertainties. Only those persons who can bear the risk of the entire loss of their investment should participate. An investor should carefully consider the risks described in the Company's MD&A for the year ended March 31, 2022 and the other information filed by the Company with the Canadian securities regulators, which are available under the Company's profile on SEDAR at www.sedar.com, before investing in the Company's common shares. The risks described in the above-noted documents are not the only ones faced. Additional risks that the Company currently believes are immaterial may become important factors that affect the Company's business. If any of these risks occur, or if others occur, the Company's business, operating results and financial condition could be seriously harmed and investors may lose part or all of their investment.
